Missed one – there's also an updated work plan for completing the SEIS, dated February 2015. It's attached here.

**Subject:** New extranet files

I just checked the extranet, and a revised draft functional assessment from December 2014 was uploaded yesterday, along with associated maps. I copied it to the server (under "Tyonek" -> "Functional Assessments") and uploaded it here: [https://www.dropbox.com/s/1ji2u5jotwr53q4/FA\\_Dec014.pdf?dl=0](https://www.dropbox.com/s/1ji2u5jotwr53q4/FA_Dec014.pdf?dl=0). There's also a document titled "CA\_Comments\_onSept2013FA," but something's wrong with the file and it can't be opened. And, there's a new document associated with the JD – an analysis of existing roads. They've created a few new folders on there too, but it looks like those are the only actually new documents.
